

# Ways Tables

Ways Tables indicate the specific ways transportation carries out its various sub-functions; they tell us how transportation does something. This section contains the aviation Ways Tables; the surface Ways Tables can be found in the [Surface Transport](#) section.

Watch the video on this page to learn how to read the Ways Tables, and use the document link to read an explanation of them. View the aviation Ways Tables by using the drop down options below.

## Ways Tables By Function - Access

| WAYS AVIATIONIMPROVES<br>FREQUENCY of ACCESS |                                            |
|----------------------------------------------|--------------------------------------------|
| PREDOMINANT<br>WAYS                          | None indicated                             |
| COMMON WAYS                                  | It saves travel time                       |
|                                              | It makes travel easier and more convenient |
| LESS -COMMON<br>WAYS                         | It preserves energy (non -specified)       |
|                                              | It preserves security (non -specified)     |
|                                              | It enables year -round access              |
|                                              | It preserves people's safety               |
|                                              | It enables women to travel unaccompanied   |

| WAYS AVIATIONIMPROVES<br>ACCESS for VISITORS |                                                                                 |
|----------------------------------------------|---------------------------------------------------------------------------------|
| PREDOMINANT<br>WAYS                          | It precludes the surface trip and its problems                                  |
|                                              | It saves travel time                                                            |
|                                              | It preserves people's safety                                                    |
| COMMON<br>WAYS                               | It reduces wear and tear on people                                              |
|                                              | It removes the need for language skills and cultural familiarity                |
|                                              | It makes travel easier and more convenient                                      |
| LESS -COMMON<br>WAYS                         | It provides reliable transport                                                  |
|                                              | It removes the need for a vehicle or boat, and the knowledge/ability to use one |
|                                              | It reduces trip unpleasantness                                                  |
|                                              | It preserves security (non -specified)                                          |
|                                              | It gives access to those not allowed to go by surface, or are too old to do so  |
|                                              | It preserves energy (non -specified)                                            |
|                                              | It preserves physical health                                                    |
|                                              | It simplifies travel logistics                                                  |

WAYS WORK WOULD BE  
AFFECTED IF NO AIR ACCESS

|                       |                                        |
|-----------------------|----------------------------------------|
| PREDOMINANT<br>WAYS   | Work would stop                        |
|                       | Fewer , or no, visits to work location |
|                       | Work would be hurt or not completed    |
|                       | Work would change                      |
|                       | Work would not start                   |
|                       | Work would slow                        |
| COMMON WAYS           | None indicated                         |
| A LESS -COMMON<br>WAY | Work would be seasonal                 |
